SUMMARY

Keen to secure a full stack software development role where I can utilize my accumulated expertise and actively engage in continual learning within a collaborative environment.

EDUCATION

National University of Computer and Emerging Sciences

Bachelors in Computer Science

📅 Aug 2018 - Jun 2022

EXPERIENCE

Full Stack Software Developer

Bari Tech Sol

📅 June 2023 - Present

- Developed enhancements for GlobalPost, a leading shipment and packaging courier company, using MS SQL Server, .NET, and React.js to enhance software infrastructure and performance.
- Worked on microservices architecture to support the scalability and flexibility necessary for handling the extensive operational needs of a major courier network.
- Utilized repository pattern to achieve abstraction and streamline shipping operations, ensuring scalable and maintainable service workflows.
- Managed version control using GitHub desktop, promoting high standards of code integrity and facilitating collaborative development through comprehensive code review processes.
- Worked with SQL for robust database management, enabling efficient and effective data handling and integration across multiple service components.

Internee Dot Net Developer

Indus Hospital

📅 April 2022 - July 2022

- Worked on .NET REST API and JQuery.

CERTIFICATIONS

• ASP .NET MVC with .NET CORE

<https://drive.google.com/file/d/1bNJAfKYwNLpluDhYaOtmSV4AEQrCtj2>

• SQL (BASIC) Certificate

<https://www.hackerrank.com/certificates/680620965892>

SKILLS

- **Technical Skills:** Full stack web development
- **Languages:** JavaScript, C#, HTML, CSS
- **Frameworks:** React.js, .NET Core, Entity framework core, Bootstrap, tailwind CSS
- **Databases:** MS SQL Server
- **Tools:** VS Code, Visual Studio, Postman, GitHub desktop
- **Libraries:** ADO .NET, Windows forms, Redux Toolkit (RTK)

SEMESTER PROJECTS

INVENTORY MANAGEMENT SYSTEM

- Built a desktop application to manage inventory of a super mart using windows form, C# and SQL server database.
<https://github.com/SyedHassaanAli880/Inventory-Management-System>

BILL MANAGEMENT SYSTEM

- Built a desktop application for maintaining warehouse, shopping mall etc. services such as payments, sales invoice, shops etc. It was purely implemented using .NET Framework and C# using WinForms and Microsoft SQL server database.
<https://github.com/SyedHassaanAli880/Bill-Management-System>

Khareed Lo

- Built an e-commerce website using ASP .NET 5.0 MVC, Entity framework core and Microsoft SQL Server.
<https://github.com/SyedHassaanAli880/KhareedLo.git>
